I recommend the following videos, mostly found on YouTube. They represent some of my interests, in Attachment Theory, Parent-Infant Interaction, Developmental Psychopathology, and Interpersonal Neurobiology

ATTACHMENT

Attachment Theory was originally formulated by John Bowlby and expanded by Mary Ainsworth and many other developmental psychologists.

DANIEL SIEGEL, MD

One of the best writers and thinkers on the connection between development, mind, and neurobiology, Dr. Siegel is the author of The Developing Mind, Mindsight, and Parenting From the Inside Out (among other books that I strongly recommend). He is also an extremely effective speaker.
